

# Istabraq

## The chain:

During the Hackathon we thought we wanted to showcase the Barometer, in a contemporary way, so we agreed on the idea of adding a chain to the device,

The Chain was created using a Torus and an Array Modifiers

Chain

## The Body:

Using the original scan from the DSM as reference, I was able to build a body that had all the original features of the initial case.

Body Front

Body Back

## Comments

- mention that polygons have been reduced in the case and probably other parts!
- mention the files name you are showing in the picture or else. in example: → case.blend

- insert more components pictures
- insert components moveable animations
- give some metadata about how much animations frames you had to use on it or how much time you spent.
- what problems occurred
- what tools you used inside blender
